

Your technology partner

DSA, acronym for **D**igital **S**uccess **A**dvisory, is the technology consulting arm of Acumen's Digital Business.

Our domain expertise in Aviation Asset Management, combined with being a Software Development powerhouse, allows us to interpret clients' operational processes with superior accuracy and provide solutions capable of optimising business outputs and improving organisation-wide productivity.

Now is the time to engage

With the overall political, social and economical factors driving companies to rethink business strategies, the common denominator is the need for digitalisation and automation of company core processes.

DSA is building a sound reputation for providing best in class technology solutions for clients. Our unique combination of deep aviation sector knowledge coupled with expertise of new technology architecture and deployment, sets us apart and enables us to actively listen, understand and create solutions that accurately meet the business need.

DIGITAL SUCCESS ADVISORY

PROVIDING
THE RIGHT SOLUTIONS
FOR YOU

Supporting the entire Value Chain

Selection

We help you navigate, discern and select the right software products and solutions as you progress on your digital transformation journey.

Maintain

Our team of product managers and analysts are equipped to help you maintain large enterprise solutions over the longer term.

Implementation

Our technical and functional consultants are adept at managing the entire software development lifecycle.

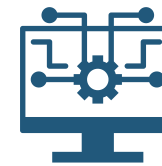

Change Management

We have the perfect balance of specialist resources to enable 100% adoption of the digital solutions you implement.

Technology Consulting

Software Development

Our pool of developers, QA engineers, DevOps and business analysts possess the skill and expertise necessary to fulfil your software development needs.

Analytics and Automations

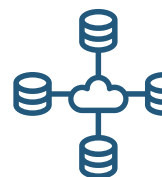

Our RPA and statistics experts, together with our development team will deliver best-in-class, integrated analytics and automation solutions.

3D Digital Twin

We have an exclusive partnership with Fabrik to implement 3D digital twin technology for aviation enterprises.

System Integration

If you have multiple systems running and there is no communication between them, we have the experience to help you integrate them.

Business Intelligence

If you are ready to procure a solution, and need business analysis support to assist you in building a technically robust RFP? We can help!
