MAINTENANCE - OPERATIONS

WELCOME

We are delighted to welcome you back to the 18th Annual Flight Operations Conference. We have faced many challenges in the past year; but the focus of this event is on building resilience, avoiding threats, owning the future and the exciting opportunities it offers.

Flight Ops today cannot function without digital processes, that much is clear. As well as the collection of data to support efficient processes and decisions with integrated and enhanced IT platforms, there are safety and efficiency benefits to be gained. How to unlock those benefits is the challenge, for airlines and operators. The drive to carbon net zero continues to be high on the agenda for most governments which also puts it high on the agenda for Flight Operations. Conflicts and global instabilities as well as extreme weather events continue to close airspace which is a challenge for flight planning and fuel costs. The rise in demand for flying, the pressure on turnaround times, political and economic tensions, are all a challenge for aircraft operations.

This year's Flight Operations Conference will showcase the best solutions with answers to meet these challenges. Additionally, it looks to an exciting future with processes and tools to plan and build long-term resilience. Key-note subjects discussed will include digital flight deck and operations, sustainable aviation, the latest real-time flight deck Apps, on-ground and flight deck connectivity, EFFs to ease pilots' workload, the latest ATC developments, integrating flight ops with M&E using ETLs, the latest aircraft and engines types, and lots more.

Along with demos of the latest, leading digital solutions and Apps, the exhibition hall offers unique opportunities for airlines and operators to meet leading flight operations solution vendors, discuss the challenges they face and their priorities. The conference agenda includes case study presentations from airlines and operators who have already started on the path to a digital future as they share their experiences. There will also be the established line-up of industry experts, and more to help you unravel and understand what is happening in Flight Operations today and the exciting opportunities available to airlines and operators in the future.

We are excited to see you in London in December.

Ed Haskey | Events Director | Aircraft Commerce and Aircraft IT

CONFERENCE HIGHLIGHTS

This conference provides you with a number of fantastic opportunities:

- **Conference Agenda:** A Two-Day Agenda of airline case studies and keynote presentations; covering the latest trends and developments in this rapidly developing sector of the industry. Click on the 'Agenda' tab above for full information.
- **Exhibition Area:** 40+ leading Aircraft Flight Operations IT and hardware Vendors are showcasing their latest solutions. Demo all the leading solutions in just 2 days. See overpage for a full list of vendors exhibiting their solutions.
- **Join 350+ attendees:** Network with your peers at airlines, Operators, OEMs, IT Vendors, Regulators and Consultants worldwide - share experiences and ideas.

SOFTWARE DEMONSTRATIONS

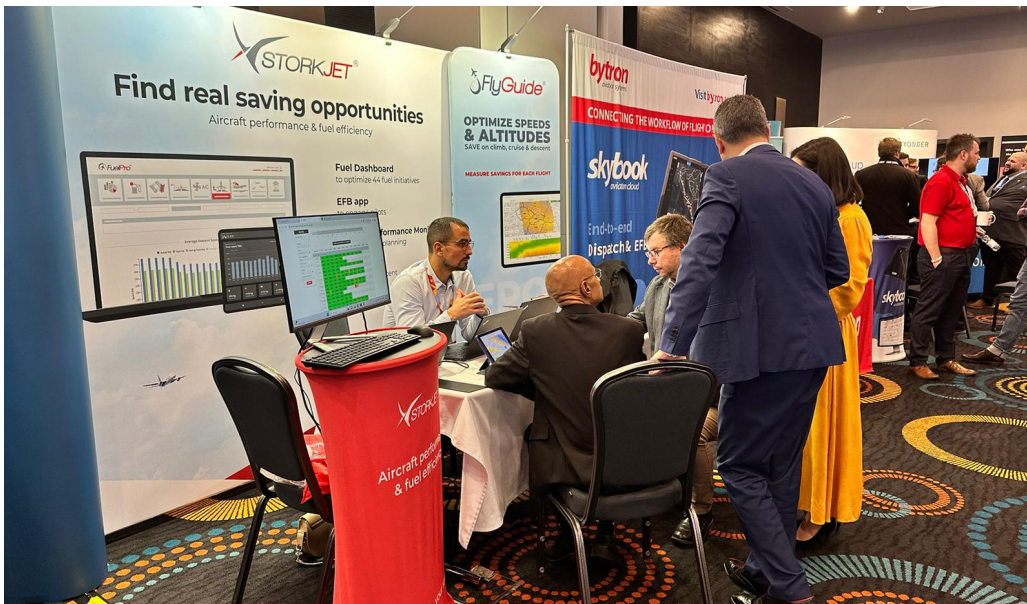

A key benefit to this event is that it allows airlines aircraft operators, and OEMs with an excellent chance to review and demo all the major software and hardware solutions in one place, in 2 days. Extended refreshment breaks provides time to browse the exhibition area, and:

- Demo the different Flight Operations solutions from the world's leading vendors and discover how they could benefit your company.
- Try out the latest system upgrades and add-ons to compliment your existing systems.
- Discuss with the exhibitors how best to overcome any problems you may be having with your current systems.

Systems available to demo in the Exhibit Hall include:

- **Sustainability:** Fuel Efficiency Solutions, Real-Time Flight Deck Apps
- **Digital Manuals and Content:** Flight Ops Doc Management, Apps for Engineers and Pilots
- **EFB:** Latest Full Systems, Pilot Apps, Real-Time Flight Deck Data, Aircraft Performance
- **ETL / ELB:** Pilot, Crew and M&E solutions and Apps from all Leading Suppliers
- **Flight Ops:** Digital OCC Apps, Flight Planning, Connectivity, Real-Time Weather
- **Data Analytics:** Predictive Analytics, Digital Twins, Reliability Reporting
- **Digital Innovations:** Mobile Device Management, Data Exchange Platforms, and more

AGENDA

The two-day agenda includes keynote presentations, case studies, interactive workshops, and IT Vendor Showcases; all delivered by airlines, aircraft operators, OEMs, MROs, Consultants, Regulators and IT Vendors to provide delegates with varied and interesting insights into the key topics in this constantly evolving aviation sector. Look out for the prize draw session at the end of day two, and your chance to win a US \$ 300.00 Amazon Voucher.

The conference agenda is currently being finalised. Check back soon for full details...

Presentations and Case Studies Currently Confirmed include:

- Smarter Weather Analytics to Improve Comfort, Avoid Turbulence, and Enhance On-Time Performance, *ITA Airways*
- Using AI-powered trajectory optimization to cut CO₂ emissions and improve operational efficiency across the network. *Corsair*
- Driving Fuel Savings and Operational Efficiency through a Modern AI-Powered Fuel Management Program with advanced Pilot Apps, *Pegasus Airlines*
- Using EFB-based trajectory optimization with contrail avoidance to reduce climate impact and fuel burn in real time. *Braathens*
- Harnessing Flight Path Optimization to cut fuel burn and CO₂ emissions through real-time pilot decision support. *Wizz Air*
- Digitalizing airline check flight reporting to replace 100+ pages of paper with real-time collaboration and data-rich workflows. *Lufthansa Technik*
- From ReFuelEU mandates to non-CO₂ effects reporting: Preparing operators for EU's 2025 and 2026 aviation sustainability rules. *ETS Aviation*
- New Technology Keynote: Revolutionary New Turbofan Efficiency Technology showing a double-digit reduction in Fuel Burn and Emissions + 2025 Test Results Revealed. *deltaBurn*
- Using satellite-enabled air traffic management to enable trajectory-based operations and more direct routing for CO₂ reduction. *Skykraft*
- Unlocking the full potential of Sustainable Aviation Fuels by aligning airline strategies with regulatory mandates and market dynamics. *Roland Berger*
- ICAO FF-ICE Keynote: With the January 1st 2026 deadline fast approaching - What airlines must to do remain compliant. *Air Support*
- Utilizing innovative techniques and technology to find and keep Pilots, *Aircraft Commerce Recruitment*

Other Case Study and Keynote Presentations to Include:

- Enhancing Flight Efficiency with Advanced Wind and Weather Uplink Technology
- Future-proofing EFB operations with eSIM connectivity to cut complexity, boost security, and lower global roaming costs
- Enhancing cockpit efficiency with a secure, adjustable mount for Electronic Flight Bags
- Streamlining Manual and Compliance Operations with Digital Documentation to Improve Efficiency, Reduce Errors, and Enable Real-Time
- Updates Using Predictive Analytics to Optimize Take-Off, Landing, and Cruise Levels
- Exploring Hybrid-Electric Regional Aircraft to Cut Emissions and Redefine Short-Haul Travel
- Implementing and Going Live with an Electronic Technical Logbook (ETL/ELB)
- plus lots more

REGISTRATION

DELEGATES INCLUDING: consultants, IT Vendors, OEMs:

EURO € 950.00 / UK £ 795.00 / US \$ 1065.00 - This option does NOT include accommodation*

* These are Early Bird prices - the prices will increase at close of business on the 4th November to EURO € 1,270.00 / UK £ 1,125.00 / US \$ 1,395.00

TO REGISTER, please

TESTIMONIALS

It is becoming THE event of the year, very important for us to participate in for information gathering and networking

Danish Air Transport

Very useful to network with the right people and to share projects with other airlines

Flydubai

Very informative and relevant to the challenges faced by airlines today

easyJet
