MAINTENANCE — OPERATIONS

WELCOME

We are very pleased to welcome back to the Airline & Aerospace MRO & Flight Operations IT Conference - Americas 2026.

Having managed several challenging years, the challenge today is futureproofing; facing the future with the confidence that comes from being prepared and properly equipped. This conference will offer you a unique opportunity to review in person and in real time the latest and best available technology to get your business future ready. Cost control, efficiency and regulation will always be with us but new opportunities and efficiencies from exciting technologies such as AI, large data models, digital and data analytics, as well as more familiar technologies will ensure that users can handle the future, face new challenges, grow and grasp opportunities with confidence. As the sector grows away from the past, IT solutions that offer scalability and flexibility will be vital to success.

Modern airline and aviation processes don't just use IT; they are built around it. Sustainability and future growth depend on it. Digitization benefits such as agility, flexibility and capability to address whatever the future holds, are clear to see. Emerging technologies like AI and large data models have the power to predict and handle the future. Unlocking that power is the challenge. Matching the right IT solution to your specific business model and process needs is the key to success.

This year we are moving back to our traditional pre-Covid March date, and the Exhibition Hall has been extended to offer airlines, operators and MROs even more access to an even larger range of leading vendors, to discuss their needs and see demos of the latest digital solutions. There will also be the usual full conference agenda of case studies from airlines, operators and MROs, sharing their experiences implementing new and modern IT solutions plus what they have gained and learned.

We look forward to seeing you in Miami in March.

Ed Haskey | Events Director | Aircraft Commerce and Aircraft IT

CONFERENCE HIGHLIGHTS

This conference provides you with a number of fantastic opportunities:

- **Conference Agenda:** A Two-Day Agenda of case studies, keynote presentations, interactive workshops, and vendor showcase sessions; covering the latest trends and developments in this rapidly developing sector of the industry. Click on the 'Agenda' link above for full information.
- **Exhibition Area:** 70+ leading Aircraft M&E / MRO and Flight OPS IT Vendors are showcasing their latest digital solutions. Demo all the leading solutions in just 2 days. See overpage for a full list of vendors exhibiting their solutions.
- **Join 600+ attendees:** Network with your peers at airlines, Operators, MROs, OEMs, IT Vendors, Regulators and Consultants from across the Americas region and beyond - share experiences and ideas.
- **Pre-conference Workshop:** See page 6 for full information and to register your seat in the workshop to register your seat in the workshop (9th March - 14:00 - 17:30).

EXHIBITION

SOFTWARE DEMONSTRATIONS

A key benefit to this event is that it allows airlines, aircraft operators, MROs and OEMs with an excellent chance to review and demo all the major software and hardware solutions in one place, in 2 days. Extended refreshment breaks provides time to browse the exhibition area, and:

- Demo the different MRO/M&E and Flight Operations solutions from the world's leading vendors and discover how they could benefit your company.
- Try out the latest system upgrades and add-ons to compliment your existing systems.
- Discuss with the exhibitors how best to overcome any problems you may be having with your current systems.

Systems available to demo in the Exhibit Hall include:

- **Sustainability:** Fuel Efficiency Solutions, Real-Time Flight Deck Apps
- **Digital Manuals and Content:** MRO & Flight Ops Doc Management, Apps for Engineers and Pilots
- **EFB:** Latest Full Systems, Pilot Apps, Real-Time Flight Deck Data, Aircraft Performance
- **ETL / ELB:** Pilot, Crew and M&E solutions and Apps from all Leading Suppliers
- **Flight Ops:** Digital OCC Apps, Flight Planning, Connectivity, Real-Time Weather
- **M&E / MRO:** End-to-End M&E / MRO Management Solutions, Digital Records
- **Mobile M&E Apps:** Real-time Mechanic Apps, Tool Tracking,
- **Data Analytics:** Predictive Analytics, Digital Twins, Reliability Reporting
- **Digital Innovations:** Mobile Device Management, Mobile Device Management, Data Exchange Platforms, AI Powered Solutions and Apps

- Sample and demo software, systems, and the latest technology from major industry vendors in the sold out exhibit hall.
- Focused presentations, case studies and workshops to address key issues relating to hardware and IT solutions
- Helps airlines, OEMs, and aerospace professionals select or upgrade IT system, or explore the latest technology advances
- Discuss the latest development & trends in civil aviation IT and systems
- **Click [HERE](#) for the latest event information**

PRE-CONFERENCE WORKSHOP AND PRE-EVENT WELCOME DRINKS

WORKSHOP OVERVIEW: AN ANALYSIS OF AIRLINE / MRO ARTIFICIAL INTELLIGENCE USE CASES AND HOW TO IMPLEMENT AND USE AN AI CUSTOM TOOLKIT WORKSHOP

Monday, 9th March 2026

14:00-17:30

During this Workshop session you'll learn how Artificial Intelligence and a custom toolkit can be used to

- Optimize your operations, compliance, continuous improvement, and digitalization programs
- Real-time AI assistant to respond to (your own data) chat-based Technical Operations processes, procedures, system user manuals, and regulations 'how-to'
- Turn video recordings into digital process maps & procedures : Useful for system demonstrations and training immediately becoming your Technical Procedures content
- Visualize and optimize the inner workings of your operations processes which are enabled using your IT systems, using a process mining approach
- Automatically generate electronic forms and automated workflows regardless of which MRO IT system you use
- Parse and tag aviation regulations (FARs, ANs, etc.) to your written procedures
- Produce operator specific risk registries and scorecards to industry best practices
- Conduct compliance impact analysis and gain recommendations for improvement across your processes and systems ecosystem
- Augment Reality with real-time relevant procedures, images, and forms with MS HoloLens and like technology
- Generate industry best practice procedures (within minutes) for any technical operations process - with user selected source limitations and databases
- Covert non-structure text-based SOP files into structured end-to-end process flows and back into standard SOPs

Also you will see specific (actual) use cases for:

- Managing aircraft lease commitments
- Integrated IT Assets Management System
- (Systems) User Training Management

Workshop Hosted by: **Allan Bachan, VP, ICF and supported by Interfacing Technologies.**

AGENDA

The two-day agenda includes keynote presentations, case studies, interactive workshops, and IT Vendor Showcases; all delivered by airlines, aircraft operators, OEMs, MROs, Consultants, Regulators and IT Vendors to provide delegates with varied and interesting insights into the key topics in this constantly evolving aviation sector.

The conference agenda is currently being finalised. Check back soon for full details...

Presentations and Case Studies Currently Confirmed include:

- Transforming dispatch operations through real-time hazard forecasting and performance optimisation, **Azul Airlines**
- Accelerating Maintenance Decisions with Event-Driven Data and Real-Time Collaboration, **Spirit Airlines**
- The relaunch of Pan Am as a paperless operation in 2026, and establishing the world's first eVTOL operation to connect with the airlines commercial flights, **Pan Am and UrbanLink Air Mobility**
- Using EFB and Charting Apps in the flight deck simultaneously, **Copa Airlines**
- Accelerating Manual Updates and Compliance to Strengthen Operational Performance, **Copa Airlines**
- Achieving Stable and Fuel-Efficient Operations Through Integrated Optimisation Strategies, **Volaris**
- Modernising Maintenance Operations with Real-Time Data for Management, Finance and Customers, **Mexicana MRO Services**
- TechOps Business Integration using AI tools, and full M&E System Upgrade to Trax eMRO, eMobility and Paperless, **Atlas Air**
- Workshop: An analysis of successful Artificial Intelligence use cases from other industries and how these can be applied to aviation, **ICF & Interfacing Technologies**
- Recent and Planned FAA EFB Operational Policy Updates, **FAA**

AGENDA

Other Case Study and Keynote Presentations to Include:

- Streamlining Post-Merger Fleet Operations Through Integrated Planning and Intelligent Work-Order Optimization.
- The use of AI-powered systems to manage digital flight operations documentation and compliance monitoring.
- Adopting a digital records-management solution to streamline fleet technical documentation, maintain essential compliance, and leverage advanced capabilities that support end-of-lease projects and aircraft transitions.
- Developing an extensive Electronic Flight Bag (EFB) solution with integrated real-time flight deck Apps.
- Implementing an advanced aircraft data-management and analytics platform to uncover actionable insights into performance, reliability, and maintenance requirements, resulting in higher aircraft serviceability.
- Implementing a NextGen software platform to support operations control and disruption management
- Moving Beyond Legacy Processes — Delivering Predictable, Data-Driven Heavy Maintenance Across a High-Utilisation Fleet.
- ATA Spec 2300: standardizing data exchange for Flight Operations - an overview
- Modernising Heavy-Use Maintenance Records with End-to-End Document Management.
- Harnessing Flight Path Optimization to cut fuel burn and CO₂ emissions through real-time pilot decision support.
- ... and more.

Vendor Showcase Sessions:

Your chance to quickly find out about the industry's leading solutions being demoed in the Exhibition Hall via these popular 6 minute showcase presentations. Showcase sessions include:

- Sustainable Aviation Solutions: Fuel Efficiency Management, Real-Time Pilot Apps, Data Analytics, Predictive Analytics
- Digital Flight Operations Manuals and Content Solutions: Content Management, Pilot Reader Apps, Electronic Forms
- EFB and Flight Operations Solutions: Latest EFB Apps and Developments, Flight Planning, Take-Off & Landing Performance
- Electronic Technical Logbook (ETL / ELB) Solutions: Stand-Alone Full Systems, Pilot & Maintenance Apps
- MRO / M&E IT Solutions: End-to-End Maintenance Management, Real-Time Mechanic Apps, Predictive Maintenance, Data Analytics, Tool Tracking

REGISTRATION

All other delegates, including: consultants, IT Vendors, OEMs, etc., please select the 'All Other Delegates' option: US \$ 1,395.00 / EURO € 1,295.00 / UK £ 1,100.00

These are Early Bird prices - the prices will increase at 17:00 (UK time) on the 3rd February 2026 to US \$ 1,395.00 / EURO € 1,295.00 / UK £ 1,100.00

TO REGISTER, please

[CLICK HERE](#)

then select All other Delegates

All delegate places include:

- Conference materials
- Access to event App
- Meals and Refreshments 10th & 11th March (*Breakfasts, Lunches, Coffee Breaks am and pm*)
- 2 hour Cocktail reception on the 10th March.

For our CANCELLATION & REFUND policy, please see our [Terms & Conditions HERE](#)

By registering using this form, it is assumed that you accept these Terms & Conditions

CONTACT US

This brochure should detail everything you need to know about the event, however, please do not hesitate to contact us if you have any questions.

TESTIMONIALS

Very good - a nice balance between workshops, case studies and vendor sales activities. Also a very useful networking opportunity. I feel I learned about the vendors current software solutions and common issues problems in the MRO world.

Virgin Atlantic Airways

This conference always provides the latest in new technologies for the airline industry. Look forward to this conference every year.

UPS

An excellent event. It was fantastic to meet with people who are at different points in a M&E selection, implemenation and online process. So much knowledge in one spot.

Transport Canada
